HiFlo CARBONTEC SYSTEM

Water Fed Pole System

Quality Tools for Smart Cleaning

HiFlo CARBONTEC SYSTEM

Water Fed Pole System

The New
HiFlo CARBONTEC SYSTEM
The Water Fed Pole for
Professionals Window Cleaners
One System – One Solution

The New **HiFlo CARBONTEC** System from Unger sets new standards in Water Fed Pole technology. Reach and clean up to 15 metres (49') with ease, through easily connected modular pole sections with internal water feed.

The light weight 1.50m & 0.75m Modular Pole Sections are made from high strength carbon fibre, wrapped internally & externally with final layers of glass fibre for added resilience and to prevent conductivity.

The precision engineered aluminium connectors are the key to the **HiFlo CARBONTEC** System. Hard anodising gives the connectors an extremely hard surface, reducing wear and increasing their working life. They enable fast assembly of pole sections to clean glass at any height from ground floor to 15 metres (49 ft) – and anywhere in between, simply by removing and adding pole sections as needed. This reduces the need for carrying multiple telescopic poles – use only the number of sections you need and keep weight to a minimum.

Pure water is delivered to the pole through the patent pending WaterFeed Assembly – a unique “any position” connector that can be placed between any **HiFlo CARBONTEC** pole section – or fitted to the base. With its on/off tap and easy fit design it adds versatility whilst keeping the trailing hose away from the user reducing trip hazards. Connection between the WaterFeed Assembly and pure water supply is made by using the Hose Kit available in 5m & 10m lengths.

The **HiFlo CARBONTEC** GooseNeck comes complete with Brush, Water Jets, and Pole Connector - ready to be connected to any section with 1.5 turns. Available with 27cm or 40cm brushes and in short or long reach version – every cleaning situation is covered. The 120° angle of the GooseNeck provides perfect brush contact with the glass.

Your **HiFlo CARBONTEC** System is complete when used with the Bag! The unique design holds ten 1.50m Pole Sections, a 0.75m Section and all your **HiFlo CARBONTEC** components & spare parts. Wheel into position, set the golf style stand and you are ready to go. It holds Pole Sections at the perfect angle for fast assembly, take apart and storage.

HiFlo CARBONTEC
One System – One Solution

HiFlo CARBONTEC SYSTEM - COMPLETE

- Simply connect to pure water supply and wash and clean to 15 metres / 49 ft
- Contains 10 **HiFlo CARBONTEC** Poles (CT15B), 1 Bag (CTKIT), 1 Hose Kit 10m (CTH10), 1 Short GooseNeck & 27cm Brush Complete (CT27S) and 1 WaterFeed Assembly Complete

HiFlo CARBONTEC SYSTEM			
Part N°	Product included in Kit	Qty	Size
CTKIT	Bag	1	17xW56xD32cm
	Hose Kit	1	10.00m
	Poles	1	1.50m (4'11")
	GooseNeck (Short) & Brush	1	27cm (11")
	WaterFeed Assembly	1	

Quality Tools for Smart Cleaning

HiFlo CARBONTEC SYSTEM Components

HiFlo CARBONTEC POLE Modular Carbon Fibre Pole Sections

- High strength carbon fibre tube with final internal & external fibreglass wrap to prevent conductivity
- Aircraft grade aluminium connectors (hard anodised) enable fast & secure connection to other tube sections (10 sections to a max. of 15m / 49ft)
- Internal water feed via a 6mm nylon tube
- Available in two sizes 1.50m & 0.75m

HiFlo CARBONTEC POLE		
Part N°	Product	Size
CT15B	Pole Section	1.50m / 4'11"
CT075	Pole Section	0.75m / 2'5"

HiFlo CARBONTEC GOOSENECK Complete GooseNeck with Brush, Jets & Pole Connector in 4 Types

- The **HiFlo CARBONTEC** GooseNeck comes complete with Brush, Water Jets, and Pole Connect - ready to be connected to any **HiFlo CARBONTEC** Pole
- Long Reach version for deep sills or ledges
- Made from hard anodised aircraft grade aluminium
- Water runs through GooseNeck, Bone and through jets in brush. Jets are easily replaced with a coin to make Brush replacement or Jet cleaning simple and efficient
- Available in 4 Types to cover all applications: Short Reach with 27cm Brush (CT27S), Short Reach with 40cm Brush (CT40S), Long Reach with 27cm Brush (CT27L) and Long Reach with 40cm Brush (CT40L)

HiFlo CARBONTEC GOOSENECK		
Part N°	Product	Brush Size
CT27S	GooseNeck (Short) & Brush short	27cm / 11"
CT27L	GooseNeck (Long) & Brush short	27cm / 11"
CT40S	GooseNeck (Short) & Brush long	40cm / 16"
CT40L	GooseNeck (Long) & Brush long	40cm / 16"

HiFlo CARBONTEC WATERFEED The Complete WaterFeed Assembly with On/Off Tap (Patent Pending)

- The unique **HiFlo CARBONTEC WATER FEED** Assembly (Patent Pending) can be positioned any where between a female & male connector or at the very base / bottom of the system
- If used between base and adjoining section the Hose Kit is kept clear of the user reducing trip hazard
- The on / off flow control at hand saves on water consumption and prevents accidental spillages in critical areas. Quick connection with Hose Kit (CTH10 / CTH05) to pure water outlet

HiFlo CARBONTEC WATERFEED	
Part N°	Product
CTWFC	Water Feed Assembly

HiFlo CARBONTEC HOSE KIT Hose Kit with Connectors

- The **HiFlo CARBONTEC HOSE KIT** is the final connection between the WaterFeed Assembly and your pure water supply
- Available in either 5 metre or 10 metre kits, the tube connects to WaterFeed Assembly by means of a brass, nickel plated, push fit connector
- Pure water attachment is via a Hose Lock Connector (CTHLC) which fits industry standard female Hozelock fittings

HiFlo CARBONTEC HOSE KIT		
Part N°	Product	Size
CTH05	Hose Kit short	5m / 16'
CTH10	Hose Kit long	10m / 33'

HiFlo CARBONTEC SYSTEM Components

HiFlo CARBONTEC BAG The Mobile Storage Solution for The HiFlo CARBONTEC System

- A purpose designed bag for use, protection & storage of the **HiFlo CARBONTEC** System
- Bag holds 10x 1.50m tubes (CT15B), GooseNeck & Brush, WaterFeed Assembly, Hose Kit and Spare Parts
- Comes complete with a "golf bag" style stand to ease connecting, taking apart and storage of tubes when window cleaning at height
- Made from rip proof, heavy duty nylon tarpaulin to protect tubes
- Large breathable opening and pockets to ensure ventilation of system during and after use
- Large wheels make manoeuvring to the job from the vehicle hassle free
- Fits inside most vehicles including small commercial vans & trucks

HiFlo CARBONTEC BAG

CTBAG	Bag	L178xW56xD32cm

HiFlo CARBONTEC BRUSH Replacement Brushes for The HiFlo CARBONTEC GooseNeck

- Replacement Brush for **HiFlo CARBONTEC** GooseNeck
- Available in 2 sizes: 27cm (11") & 40cm (16")
- Special fibre bristles designed for Window Cleaning & in particular Pure Water Window Cleaning
- Bristles are easily rinsed and do not hold dirt in the tips to ensure streak – free cleaning
- Easy fit, remove Jets from previous Brush & GooseNeck and fit replacement, tighten using a coin or screwdriver

HiFlo CARBONTEC BRUSH		
Part N°	Product	Size
CT27B	Brush short	27cm / 11"
CT40B	Brush long	40cm / 16"

HiFlo CARBONTEC HOSE LOCK CONNECTOR

Replacement Connector for Hose Kit

- Replacement Hose Kit Connector (for Hozelock fittings)
- Made from anodised aluminium for longevity

HiFlo CARBONTEC HOSE LOCK CONNECTOR		
Part N°	Product	
CTHLC	Hose Lock Connector	

HiFlo CARBONTEC HOSE SYSTEM OVERVIEW
