The Tucker® Pole Window Washer System prices are complete units as listed; includes a Tucker® Pole Tool, all have attached hose(s), gooseneck and choice of Brush. A 12 DT (double trim) will be shipped unless otherwise specified. If the price of desired brush is more than the 12DT price, the difference will be added to the invoice. An 8 inch gooseneck is standard, but any desired length up to 36 inches will be supplied, if specified. If the price of the desired gooseneck is more, then the price difference will be added to the invoice. B and C Methods have detergent dispenser and 1 pound lug of detergent tablets. All window washers printed in BLUE INK can be operated by one person. See separate price sheet for X Method Systems, Tucker® Pole Exterior Maintenance Systems.

Window washers printed in RED INK are made of one 6 foot Top section and 12 foot bottom sections of heavier tubing and require one person on the roof and one or two on the ground to operate. An assist cord the same length as the hose is supplied to enable the person on the roof to aid in moving the brush from window to window and to raise and lower the unit. They are not general purpose units: instead, they should fit certain buildings. 12 foot section models are firm orders and are not returnable. Special freight charges apply due to the size of the box(s).

Brass Quick Connects for 3/4" garden hose **PART# TQC-34 \$ 10.56**
Mini Brass Quick Release Handle Set for single hose* **PART# MINIQC \$ 23.29**

WATER TREATMENT for various Tucker® Pole Washer Models

TDI835 DI System

Includes 8" x 35" DI tank with mixed resin beads, head assembly, hand hel TDS meter, and shipping box. Weight is 55 pounds. Regeneration of DI Tank resin beads required is based on the total dissolved solids (TDS) in your local water.

PART# DITDI835 \$594.00

Other sizes may be available per quote.

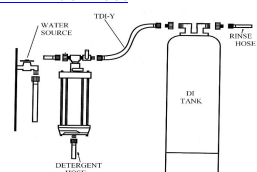

Tank colors can vary.

\$ 90.00

Tucker Regeneration Service Program on TDI835 DI Tank *** and up
*** Subject to market pricing changes, includes environmental fee.
Call for estimated freight costs and instructions for servicing DI tanks. Regeneration is available on other size tanks.

TDI-Y Connect

PART# DIY001 \$ 22.99

Is used with Methods B, C and X detergent dispensers, so you can rinse with DI water only. Consists of extra hose and connectors.

Hand Held TDS Meter

PART# DITDS \$ 43.85

This hand held TDS meter determines hardness in ppm (parts per million) for your input and/or output water. We recommend the hand held meter to determine your local TDS especially, if you plan to purchase or rent locally your DI Tanks and/or water treatment from a local source in your area.

TDI420C DI Cartridge System

Includes 4.5" x 20" DI Cartridge with mixed bed resin, housing, head assembly, hand held TDS meter. Weight is 10 pounds. Replacement cartridges need based on your local TDS. Not recommended for all locations.

PART# DITDI420C\$ 459.00

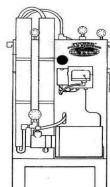

DI Replacement Cartridges

PART# DIC-20-4.5 \$ 167.40

Check-list before purchasing the right model:

1. Do you know your local TDS of your water?
2. Do you have access to a standard water faucet?
3. Do you know what your maximum reach will be?
4. Will you need detergent now or in the future?
5. Will you be purchasing water treatment or obtaining it locally to assure the highest quality results when rinsing?
6. Do you have the model number of your Tucker Pole?
7. Do you have the part numbers of any accessories? (this checklist was designed for window cleaning use)
