The AutoFlush® sends out a continuous infrared beam that is reflected back by the presence of a person in front of the urinal or toilet. "Object Lock" technology differentiates between someone walking past the unit or actually using the fixture.

**AutoFlush® Components**

- **AutoFlush® for Urinals**
- **AutoFlush® for Toilets**

**INSTRUCTIONS**

1.1 Using the supplied Allen wrench, remove battery compartment.

1.2 Remove AutoFlush® cover by rotating the cover up at the end over the battery compartment and slide out. See illustration 1.2.

1.3 Using the handwheel, unscrew the two hex bolts at the neck of the unit until a few threads are still screwed into the mounting bracket.

1.4 Slide the AutoFlush® on to the flush handle and secure the mounting clamp over the existing handle base.

1.5 Replace the AutoFlush® cover. See illustration 1.5.

1.6 Install 4 "C" cell alkaline batteries into the battery compartment noting the battery position marks on the inside of the compartment. Slide the battery compartment into the AutoFlush® unit and secure tray with Allen wrench. The last three turns of the wrench will activate the AutoFlush® unit.

**NOTE:** Fits Sloan and Zurn flush handles. To fit other flush handles contact TC customer service at 800-551-5155.
**TROUBLE SHOOTING GUIDE**

**OBJECT LOCK SENSOR**

1. Remove battery compartment. See illustration 2.1.
2. Replace battery compartment in AutoFlush® unit and remove rubber seal. See illustration 2.2.
3. Replace battery compartment in AutoFlush® unit, battery seal, and remove rubber seal. See illustration 2.3.
4. Install battery compartment tray to reactivate AutoFlush® unit.

**TO CHANGE ACTIVATION DISTANCE FOR THE OBJECT LOCK SENSOR:**

- After 7 minute sequence, the green L.E.D. will flash only 3 times when a user is in view (after a 5 second delay).

**USER-IN-VIEW L.E.D.**

- Flashes 3 times = User acknowledged & ready to operate.
- Flashes continuously = User acknowledged & ready to operate.
- Flashes 3 times after 5 second delay = User acknowledged & ready to operate.

**ALARM TONE OFF**

- Alarm Tone On
- Alarm Tone Off

**24 HOUR FLUSH**

- 24 Hours Flush On
- 24 Hours Flush Off

**VISUAL INDICATOR GUIDE**

- User-In-View LED (Green) Flashes 3 Times = User acknowledged & ready to operate.
- Battery LED (Yellow light flashes indicating it is time to replace batteries with 4 new cell alkaline batteries).

**APPENDIX A - ADJUSTING YOUR AUTOFLUSH ®**

1. Remove battery compartment.
2. Use Allen wrench to remove the rubber seal.
3. Replace the battery compartment and the rubber seal.
4. Press the sensor range reset button as indicated in Appendix A. NOTE: the green L.E.D. will flash continuously when it has detected an object in the view area.
5. Stand at desired activation distance.
6. Use provided sensor adjustment tool and turn Sensor Range Screw all the way down (counterclockwise) and then turn slowly up (clockwise) until green L.E.D. begins to flash.
7. After 7 minute sequence, the green L.E.D. will flash only 3 times when a user is in view (after a 5 second delay).
